

Goals of the NexLube Closed-Loop

- Shared commitment to recover the highest valuable products from waste.
- Address EPA's desire to discover "Environmentally friendly high technology solutions."
- Help us grow and prosper as a nation by meeting recycling and green economy targets.
- Encourages governmental entities to consider re-refining used oil as an alternative to burning as a fuel.
- NexLube's new and proven technology is ready to start processing used oil generated throughout Florida.
- Follow through on the Federal mandate to encourage at least 25% use of re-refined lubricants.
- Help non-renewable petroleum last for future generations.
- Provide a more environmentally preferred use for used oil over the conventional method of burning it as a fuel.
- Decrease greenhouse gas and heavy metals emissions compared to burning used oil as fuel.

The mission of our "NexLube Closed-Loop" is to bring together all our customers:

- Generators to participate in the supply chain for re-refining the used oil.
- Collectors / Aggregators to provide the best recycle value to their product.
- Use re-refined lubricants for all your company vehicles.
- Private and public fleets to use re-refined lubricants as stipulated by EPA RCRA Section 6002 (C) (1)
- All the customers to become a part of the NexLube Closed Loop and help the environment, the local economy, and reduce our dependency on imported oils.

Customer Questions:

- Do you want to maximize resource conservation and environmental benefits?
- Do you want to reduce harmful emissions?
- Do you want to help lowering our dependency on foreign oil?
- Do you want to work closely with NexLube in the "Closed-Loop Cycle"?

NexLube Closed-Loop

The Sustainable Solution
for a Green Economy

Be the premier source
of the closed-loop
re-refining for
renewable lubricants
