

Asphalt Flux – A 1000

Asphalt Flux is a thick tar-like material that results from a controlled re-refining process.

Applications:

- For use by the paving industry (as a component of their asphalt paving mix)
- For the roofing industry (in the manufacture of roofing and coating materials)
- Specialty industrial applications (for waterproofing, joint sealing, crack fillers, adhesives, and other specialty uses)

Specifications:

Specification	Test Method	A-1000 Typical (*)
Appearance	Visual	Black
Density @ 15C, kg/m ³	D-1298	1150
Specific Gravity @ 60F/60F	D-287	0.94
API @ 60F	D-4052	14.6
Viscosity, cSt @ 100C	D-2170	1250
Sulfur %, wt	D-4294	0.9
Flash Point, F, COC	D-92	490
